We treat our patients children under the NHS

We have strong family values and are committed to treat our patients under the NHS until they leave higher education.

Let us smile at your smile

What to expect from your first appointment

Your First Appointment

Your first appointment allows ample time to discuss your requirements in a relaxed and friendly way. A complete and thorough assessment, including any dental x-rays, is taken followed by a discussion of the options available to you. Sometimes, where the more complex dental treatment is involved, more than one appointment is necessary. Our aim is always to keep your treatment as simple as possible.

Children's Appointment

We firmly believe that caring for children's teeth and teaching them about good oral health is vital. Families are welcome and we endeavour to make your children's visits as pleasant and informative as possible.

Emergency Appointment

We aim to see emergencies as soon as possible, usually the same day. Please contact the practice as early as possible and we will offer an appointment as soon as we can. Out of hours emergencies are covered by NHS 24 on **08454 24 24 24**.

BDA Good Practice Membership

Chartwell was one of the first practices in Scotland to join the BDA Good Practice Scheme which recognises dental practices which consistently meet the high standards set by the British Dental Association. We are only one of seven practices in Scotland to be recognised with gold status for being a member for over ten years.

BDA Good Practice Commitments

- We aim to provide dental care of consistently good quality for all patients
- We only provide care that meets your needs and wishes
- We aim to make your treatment as comfortable and convenient as possible
- We look after your general health and safety while receiving dental care
- We follow current guidelines on infection control
- We check for mouth cancer and tell you what we find
- We take part in continuing professional development to keep our skills and knowledge up-to-date
- We train all staff in practice-wide work systems and review training plans once a year
- We welcome feedback and deal promptly with complaints
- Every member of the practice is aware of the need to work safely under General Dental Council guidelines.
